

## **Activity Sectors and Services provided**

Mechanical-Plant Industrial Design by means of advanced Graphics Technologies for 3D Drawings and Models development.

Prototype realization on Client's request.

Design and Project of Vehicles Interiors with integration between lining and plants.

Argos' activity arises from the need of a "3D Modelling linked to design", based on several softwares integrated with simulation and calculation systems.

Argos has provided Design activities and services in many fields: Chemical, Textile, Pharmaceutical, Paper, Robotics, Automotive and Railway.

### **Railway Sector**

HVAC Systems for Railway Vehicles

Design and assembly of vehicle internal and external devices and plants

Re-Designing of plants and coach parts in general

### **Paper Sector**

Design of wrapped boxes manufacturing machines and paper-cardboard coupling machines  
Special hydraulic systems, micro-motion devices with several types of motors, design  
of rounding machines, paper edge-cutting machines, glueing machines and others.

### **Chemical-Textile Sector**

Centrifugal machines design for Textile, Chemical, Pharmaceutical Industries; Design of  
centrifugal glassworks muds filtering plants; Design of centrifugal oil-filtering plants for metal  
chips.

### **Pharmaceutical Sector**

Design of one-use glass tubes control machines

### **Textile Sector**

Design of several machines Textile Industries, CE handbooks and Technical Exploded Spare  
parts handbooks.
